

Senior Software Engineer | Product Engineer | Applied AI

Lyon, France | Remote Europe & Switzerland | US working hours

Senior software engineer building SaaS and AI products end to end, from product decisions and architecture to implementation and production. I work daily across TypeScript, React, Python and cloud infrastructure, with LLM systems operating in production. I have built multiple 0-to-1 products and led a seven-person Product & Engineering team.

EXPERIENCE**Senior Software Engineer, MagicPost** | LinkedIn content SaaS

Oct 2025 – present

- Own feature delivery across frontend, backend and infrastructure, from product decisions to production; review code, mentor junior developers, and ship programmatic SEO and acquisition tools.
- Design and operate production LLM pipelines spanning context engineering, personalization, retrieval, model routing and evaluation, balancing quality, latency, cost and availability.
- Built the FastMCP server exposing 30+ product capabilities; lead the Heroku-to-Azure migration across services, workers, data, secrets, networking and observability.

Independent Product & AI Consultant | Product discovery, prioritization and roadmap for two startups.

2024 – 2025

Software & Product Engineer, MateMaker

Oct 2023 – Jan 2025

- Independently built and launched a matchmaking app for gamers: 10,000 registered users and 2,300 monthly active users.
- React Native, Expo, TypeScript and Firebase: realtime chat, notifications, Discord integrations, product analytics and acquisition loops.

First Engineer, then CTO & co-founder, LIGHT (ex Scale You Up)

Oct 2021 – Sep 2023

- As first engineer, owned the initial architecture and shipped the first versions of the HRTech platform from requirements to production (Next.js, Laravel, GCP).
- As CTO, shipped three products in production, including an AI-assisted diagnostic and a generative recruiting assistant with 2,000 users; hired and led a seven-person Product & Engineering team.
- Company context during my tenure: €1.5M pre-seed raised, €2M revenue in year one, with customers including Spendesk, Agicap, Shine and Haier.

Early career | CTO at Mainstream.gg | IoT business manager at Agixis | freelance web developer alongside engineering studies (2016-2019) | computer science instructor, IONIS

2016 – 2021

SIDE PROJECT**SideQuest** | getsidequest.fr | app for video game collectors

Since Jun 2026

- Multi-source catalog normalizing games, platforms and physical editions; identification through EAN/UPC barcodes, OCR from box photos and fuzzy matching.
- Automated monitoring and ranking of Vinted and Leboncoin listings: modular connectors, deduplication, scheduled scans and push notifications. React Native, Next.js, Python, FastAPI and Supabase.

SKILLS

Languages	TypeScript Python JavaScript SQL
Engineering	React React Native Next.js Node.js FastAPI Flask Astro
Applied AI	LLM pipelines context engineering retrieval evaluation model routing MCP
Infrastructure	PostgreSQL Redis Supabase Azure Cloudflare CI/CD observability

Education: Epitech, Expert in Information Technologies (2014-2019)

Languages: French (native), English (professional)
